

CONNOR BEAN

Winnipeg, MB R3R 0M9 · (204) 918-0758

williamconnorbean@gmail.com

Technical leader who believes the best way to scale impact is through the people around you. Focused on creating growth opportunities for developers, building cross-team knowledge, and staying a step ahead of what the team needs next.

WORK EXPERIENCE

Tech Lead, Development

May 2024 - Present

PAYWORKS

- Provided technical direction and advisory on migration strategies for the Sugar to Salesforce transition, contributing to a high-impact outcome recognized across the organization.
- Provide daily technical oversight and code review for a team of contracted developers, ensuring alignment with department standards and project goals.
- Lead the squad's adoption of Spec-Driven Development using Spec Kit, defining how agentic AI tooling will be leveraged on an upcoming greenfield project.
- Serve as the go-to technical resource for payroll application questions across teams, reducing bottlenecks on domain knowledge.
- Conduct full-cycle technical and behavioral interviews for full-time and co-op positions, serving as a consistent and trusted voice in engineering hiring decisions.
- Expanded QA team capabilities by enabling independent authoring and execution of Playwright tests, extending technical influence across the department.

SOFTWARE DEVELOPER

Jan 2021 - May 2024

PAYWORKS

- Spearheaded the design and implementation of a CMS-driven marketing website, resulting in a notable increase in leads.
- Mentored 5 co-op students to enhance their technical abilities and facilitate integration into a cross-functional team.
- Collaborated on creating a JavaScript library for building accessible web components, resulting in a more inclusive user experience.

SOFTWARE DEVELOPER (CO-OP WORK TERM III)

Sept 2019 - Dec 2019

BOLD COMMERCE

- Implemented an event-based email system, enabling clients to send personalized order notifications to customers.
- Developed a user-friendly interface for managing third-party API keys, allowing clients to access and manipulate data about their E-commerce store seamlessly.

SOFTWARE DEVELOPER (CO-OP WORK TERM II)

Jan 2019 - May 2019

RED RIVER MUTUAL

- Developed custom SQL reports that provided financial insights to the business, enabling data-driven decision-making.
- Optimized the Guidewire suite by applying best coding practices; improving user experience and workflow.

SYSTEM DEVELOPER (CO-OP WORK TERM I)

May 2018 - Aug 2018

PAYWORKS

- Implemented a web API and front-end UI that enabled administrative users to manage employee permissions efficiently.
- Collaborated with team to design a secure database schema for managing calendar view permissions for employees.
- Created postman integration tests and XUnit web API unit tests, ensuring the quality of future releases.
